The line graph represents historical performance of a hypothetical investment of \$10,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.**

## How did the Fund perform in the last year?

The Fund modestly underperformed its benchmark, the Bloomberg Intermediate U.S. Aggregate Bond Index (USD) — which tracks the performance of fixed-rate, publicly issued, non-investment-grade bonds — for the 12-month period ending June 30, 2025.

The Federal Reserve ("Fed") surprised the markets by reducing the federal-funds rate by 50 basis points (0.50%) at its September 2024 meeting, then followed up with additional 25-basis point cuts at its November and December meetings. Since then, the Fed has been on pause as the central bank continues to evaluate the effects of trade and fiscal policy on the broader U.S. economy and financial markets.

Fund performance for the reporting period was bolstered by security selection in corporate credit. This was partially offset by a slightly underweight allocation to the sector. An overweight allocation to and security selection in agency mortgage-backed securities ("MBS") also contributed to Fund performance. An overweight to asset-backed securities ("ABS") enhanced performance, particularly prime tranches within auto loans and credit cards and an allocation to AAA rated collateralized loan obligations ("CLOs"). Within the commercial mortgage-backed securities ("CMBS") sector, allocations to higher-quality tranches and Class A properties (the highest quality, newest, and most desirable buildings in a market) contributed to Fund performance. A slightly long duration posture had minimal impact on performance, while overweights to both the two- and five-year segments of the U.S. Treasury yield curve were positive contributors to performance. At the manager level, Metropolitan West Asset Management LLC outperformed the Fund's benchmark since the beginning of its tenure as a manager in October 2024, given its overweight position and security selection in agency MBS. Income Research + Management benefited from positioning within the ABS sector, particularly prime credit cards, auto loans, and AAA rated CLOs.
